RESEARCH INTERESTS

computational graph theory, topology, boolean satisfiability, logic, algorithms, formal math, interactive theorem proving, type theory

EDUCATION

PhD, Mathematics 2015-2021
University of Illinois at Urbana-Champaign

Integrated BS-MS, Mathematics, *Director's gold medal* 2010-2015
Indian Institute of Science Education and Research – Kolkata

PUBLICATIONS

V. Karve, A.N. Hirani.

The complete set of minimal simple graphs that support unsatisfiable 2-CNFs
Discrete Applied Mathematics (2019), doi.org/10.1016/j.dam.2019.12.017

V. Karve, D. Yager, M. Abolhelm, D.B. Work, R.B. Sowers.

Seasonal Disorder in Urban Traffic Patterns: a Low Rank Analysis,
to appear in Journal of Big Data Analytics in Transportation.

Y. Wu, G. Shindnes, **V. Karve**, D. Yager, D.B. Work, A. Chakraborty, R.B. Sowers.

Congestion Barcodes: Exploring the Topology of Urban Congestion Using Persistent Homology (2017), [arXiv:1707.08557](https://arxiv.org/abs/1707.08557)

DEVELOPED SOFTWARE

graphsat: A python package for handling computations on sentences in conjunctive normal form, boolean satisfiability, and multi-hyper-graphs. To appear on the Python Packaging Index in 2021, as part of PhD thesis.

multihypergraph: A python package for graph theory that supports looped- multi- and hyperedges. PyPI: [/multihypergraph](https://pypi.org/project/multihypergraph/)

Model theory in lean: A model theory implementation in the Lean theorem prover. Joint work with E. Blanchard, S. Harman, P. Hieronymi, N. Ravi, J. Schargorodsky, K. Thompson, N. Wulffraat, T. Xu, F. Zhao. GitHub: [/vaibhavkarve/igl2020](https://github.com/vaibhavkarve/igl2020)

RESEARCH EXPERIENCE

PhD Thesis 2018-Present

Graphical structure of unsatisfiable Boolean formulae

Advisor: Dr. Anil Hirani

University of Illinois at Urbana-Champaign

- Fall 2020: funded by the David G. Bourgin fellowship.
- Defined a translation map from boolean 3-satisfiability instances into multi-hyper-graphs.
- Wrote a python package that computes CNFs (sentences in conjunctive normal form) as well as multi-hyper-graphs.
- Attempting a forbidden-graph characterization for 3-satisfiability.

Graduate Research Assistant

Fall 2019

Forbidden graph characterization for 2-satisfiability

Advisor: Dr. Anil Hirani

University of Illinois at Urbana-Champaign

- Used forbidden-graph characterization to demonstrate a finite obstruction set for satisfiability.

Summer Graduate School

July 2018

Invited to Representations of High Dimensional Data summer graduate school

Mathematical Sciences Research Institute (MSRI) in Berkeley, California

Graduate Research Assistant

Summer 2017, Spring 2018

Non-negative matrix factorization of New York taxi traffic

Advisor: Dr. Richard Sowers and Dr. Daniel Work

University of Illinois at Urbana-Champaign

- Analyzed taxi traffic data from New York city with special focus towards compression and estimation.
- Used Sparse Non-negative Matrix Factorization to extract 50 of the most popular traffic trends in New York.
- Gained new insights into traffic dynamics, with a view towards aiding urban planning and extreme-event predictive algorithms.

NSF Program for Interdisciplinary and Industrial Internships at Illinois (PI4) Intern

Summer 2016, Summer 2017

Recognizing patterns in New York taxi traffic

Advisor: Dr. Richard Sowers and Dr. Daniel Work

Funded by NSF, University of Illinois at Urbana-Champaign

- Analyzed taxi traffic data from New York city.
- Applied Persistent Homology tools to generate bar-codes that can characterize the traffic dataset.

MS thesis

2014-2015

Classification of Stable Exterior Forms

Advisor: Dr. Saugata Bandyopadhyay

Indian Institute of Science Education and Research – Kolkata

- A complete classification of all stable exterior forms was sought over both the real and complex fields. This involved finding the orbits, stabilizers and normal forms for each case, under the action of $GL(V)$ through pullback.

Canada Mitacs intern

Summer 2014

Unitary Representations of Super-Conformal Algebra

Advisor: Dr. Hadi Salmasian

University of Ottawa

- Construction of the Super-Virasoro algebra, which arises as a \mathbb{Z}_2 gradation of the central extension of a Lie algebra of differential operators, called the Witt algebra, was studied. This algebra arises naturally from the calculations of string theory.
- The unitary representation for the Super-Conformal current algebra, seen as a semi-direct product of the Super-Virasoro and the Super-Loop algebras was found.

IISER research intern

2011-2013

Mathematical Modeling of Calcium Ion Oscillations due to Membrane Fluxes in Pancreatic Cells

Advisor: Dr. Pranay Goel

Indian Institute of Science Education and Research – Pune

- A minimal model was developed, as a variation of the class-1 Li-Rinzel model to explain the anomalously *slower* oscillations observed in pancreatic cells. The numerical integration software XPPaut was employed for solving the differential equations involved and generating the bifurcation diagrams needed.
- The model was able to reproduce all experimental data on the reaction of these cells to CPA, oleate and EGTA accurately.
- This work was in collaboration with Dr. Arthur Sherman and Dr. Les Satin.

IISER research intern

Summer 2012

Mathematical Modeling of One-Carbon and Glutathione Cycle

Advisor: Dr. Pranay Goel

Indian Institute of Science Education and Research – Pune

- The literature on existing models of the glutathione cycle was studied and the equations were successfully simplified, making them more tractable for any future work on this system.

TEACHING AND MENTORING

Illinois Geometry Lab Mentor

Fall 2020, 2016-2017

University of Illinois at Urbana-Champaign

- The Illinois Geometry Lab at UIUC aims to enhance and support undergraduate research within the department and to engage local, state and national communities through outreach.
- 2020: Led a team of undergraduates in a research project titled *Theorem proving in Lean*. The project aims to formalize model theory in Lean. GitHub: [/vaibhavkarve/igl2020](https://github.com/vaibhavkarve/igl2020)
- 2016-2017: Led a team of undergraduates in a research project that visualized urban traffic patterns temporally and spatially, using matrix factorization algorithms as well as persistent homology.

IGL–UniHigh Summer Research PI

Summer 2020

Interactive theorem proving in Lean: formalizing Euclidean and Hilbertian geometry

Illinois Geometry Lab, University of Illinois at Urbana-Champaign

- Led a 5 week summer research project with high-school seniors.
- We formalized Euclid's and Hilbert's axioms in the Lean interactive theorem prover. GitHub: [/vaibhavkarve/leanteach2020](https://github.com/vaibhavkarve/leanteach2020).

Graduate Teaching Assistant

Spring 2019, Spring 2020

Computational Mathematics

University of Illinois at Urbana-Champaign

- Conceptualized and designed the course with Dr. Anil Hirani.
- Course utilizes innovative teaching platforms like CoCalc to teach programming in Python and SageMath to undergraduates.
- Topics covered include network and graph algorithms, topological data analysis, computer algebra and cryptography algorithms.

Graduate Teaching Assistant – Merit Program for Emerging Scholars

Calculus I, II, III and Differential Equations

University of Illinois at Urbana-Champaign

- The Merit Program for Emerging Scholars targets students with high potential who are members of groups, such as ethnic minorities and women, who tend to be underrepresented in the areas of science, mathematics and engineering.
- Taught in active-learning formats.

Fall 2016, Spring 2017,
Fall 2017, Fall 2018**Graduate Teaching Assistant**

Calculus III

University of Illinois at Urbana-Champaign

- Taught in active-learning, discussion-based formats.

Fall 2015, Spring 2016

Summer Illinois Math Camp – instructor and course designer

Classical Constructions: Learn to draw algebra

University of Illinois at Urbana-Champaign

- Designed and taught a week-long course for 9th through 12th grade students.
- Course description: What can we do with a compass and a straightedge? These simple tools can be used to create shapes, do arithmetic and prove fun facts about geometry. This course taught students geometry as the ancient Greeks saw it, using only tools that were available then.

Summer 2017

Undergraduate Teaching Assistant

Real Analysis, Calculus I and II

Indian Institute of Science Education and Research – Kolkata

2013-2014

FELLOWSHIPS**David G. Bourgin Mathematics Fellowship**

Department of Mathematics, University of Illinois at Urbana-Champaign

Fall 2020

Gene H. Golub Summer Research Fellowship

Department of Mathematics, University of Illinois at Urbana-Champaign

Summer 2019

Innovation in Science Pursuit for Inspired Research (INSPIRE) Fellowship

Awarded by Department of Science & Technology, Government of India

2010-2015

AWARDS**Departmental TA Instructional Award**

Department of Mathematics, University of Illinois at Urbana-Champaign

2019

Honorable Mention – Image of Research Competition

Graduate College, University of Illinois at Urbana-Champaign

Awarded for visualizing Kaprekar's process

2019

Listed on Teachers Ranked as Excellent

Center for Innovation in Teaching and Learning, University of Illinois at Urbana-Champaign

Fall 2015, Spring 2016, Fall 2016, Spring 2017, Fall 2017

Fall 2018, Spring 2019, Spring 2020

IGL Research Award*

Illinois Geometry Lab, Department of Mathematics, University of Illinois at Urbana-Champaign

*awarded to Manhattan Traffic IGL research team

Fall 2016

People's Choice Award

Research Live! Competition, University of Illinois at Urbana-Champaign

2016

Director's Gold Medal

Indian Institute of Science Education and Research – Kolkata

2015

PROGRAMMING SKILLS**Languages**

Python, Lean, SageMath, Octave, Coq, Haskell, ELisp

Software \LaTeX , plain \TeX , CoCalc, XPPaut**CO-CURRICULARS****Dramatics**

Active member of the dramatics club at IISER Kolkata, having conceptualized, scripted, acted in and directed over a dozen plays.

2010-2015
